

## **Osmosis Capital Appoints Augentius Fund Administration**

**28 July 2009** – Osmosis Capital LLP, a specialist asset manager focused on the development of low carbon investment solutions for institutional investors, announces that it has appointed Augentius Fund Administration as the administrator for its forthcoming fund of funds.

Paul Bramley, Chief Financial Officer, Osmosis Capital, said:

“We considered a number of administrators and after a lengthy and detailed process selected Augentius. They come highly recommended and their experience in administering Private Equity and Renewable Energy Funds, combined with their flexibility to tailor their services to our needs, were key determining factors in our decision.”

“This is a group we are genuinely thrilled to be selected to work with,” commented David Bailey, Managing Partner of Augentius. “Osmosis Capital is a high quality team, investing in a product in which we have a great deal of experience, and we are very much looking forward to a long term partnership with the firm. The trend for GPs to outsource their fund administration continues to grow and the quality of service provided by Augentius continues to attract numerous clients to us.” he said.

**Note to editors:**

**Osmosis Capital LLP (“Osmosis Capital”)** is a specialist independent asset management company focused on providing low carbon investment solutions to a global institutional investor base.

Founded in 2008, Osmosis Capital develops investment solutions that enable institutional investors to access the significant global opportunities in the low carbon sector.

Osmosis Capital’s investment strategy is based on committing capital to private equity and venture capital funds globally which have a significant focus on low carbon investment opportunities, in particular in the areas of renewable energy and energy efficiency.

The Osmosis Capital team has extensive knowledge of the low carbon market and a deep understanding of the unique attributes of investing in the sector. This, combined with its strong asset management experience, enables the firm to provide investors with targeted low carbon investment solutions that are anticipated to deliver superior, risk adjusted fund returns over the long term.
